Board with hooks Max*5*

Ligature resistant board with hooks

- 360° release at max 5 kg load
- Flexible material prevents physical injury
- Tight fit to the wall and extremely difficult to detach

The Hook Max*5* holds the weight of an item of clothing or a towel, but when an extra force is applied it releases. The hook does not break but bends, forcing the ligature to slide off. Releases in all directions, hence it can be placed close to doors etc.

Close fit against the wall to reduce the risk of a string or similar to be jammed between the wall and the board. The patented self-harm and ligature resistant Hook Max*5* is designed with the aim to add colour and design to the care environment, still fullfilling the need for safety.

HSI 172	Board w hooks Max*5*, 5 hooks**, 930x90x60 mm

Standard version: Hook Max5 in white. Other colors on request. ** Order item. Special: dimensions on request.

Technical data

Load release tests of the hook using a string in vertical and horizontal directions releases at max 5 kg.

Materials

Hook: PC/ABS (core) and TPU (outer part)
Board: Compact laminate (HPL)

Mounting

The board with hooks is mounted according to mounting instructions, on a flat wall surface to obtain a good connection to the wall and thus prevent the possibility of attaching a string or the like between the wall and the hooks or the board. Board and hooks are mounted with security screws, JT-271.

Maintenance

Resistant to most detergents and alcohol.

Delivery and Warranty

Orders will be shipped within 2-4 weeks. HSI 171, HSI 172 and special according to offer.

3 years warranty: Applies to ascribed use. Full warranty against manufacturing defects.

Disclaimer, please see our website:
www.healsafeinterior.com/disclaimer

Sustainability

The hook and board are designed to have a long lifespan. Recycling: Hook as plastic. Board as combustable.

Designed and produced in Sweden. Patent pending.

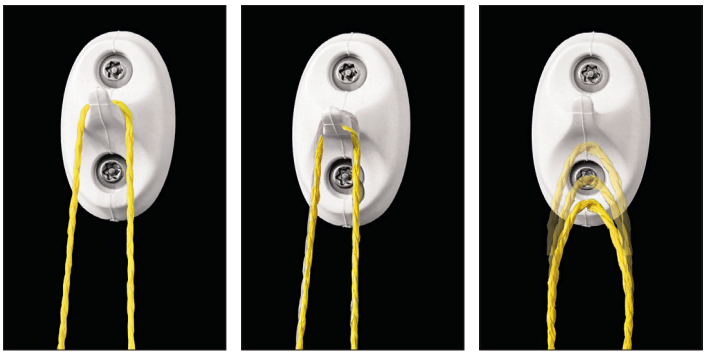
Detail of Board with hooks *Max5* with bevelled edges for increased safety and security.

Hook *Max5* is available in 5 colours: *white*, *grey*, *black*, *beige* and *magenta (see image)*.



The hook does not break but bends, forcing the ligature to slide off. The hook then regains its function and shape.
