ropimex®

Telescopic arms

You can't trip over things that hang on the wall. Which is why we created ropimex® telescopic screens, the screen that's only there when it's needed.
After use, simply push the screen together and turn it towards the wall. Your room is back to looking its familiar self.

To a max. 210 cm

Vario rail system

Model RVS

Vario rail system RVS:
One system – any number of options!
Slanting walls? Acute angle? No problem!

We supply wall connectors, which can be continuously adjusted up to 180 degrees – and compensate for virtually any asymmetry in the architecture. Move or renovation: The rail system is designed to adapt to new requirements at any time.

- **quickly assembled**
- **mega variable**
- **durable**

Vario rail system

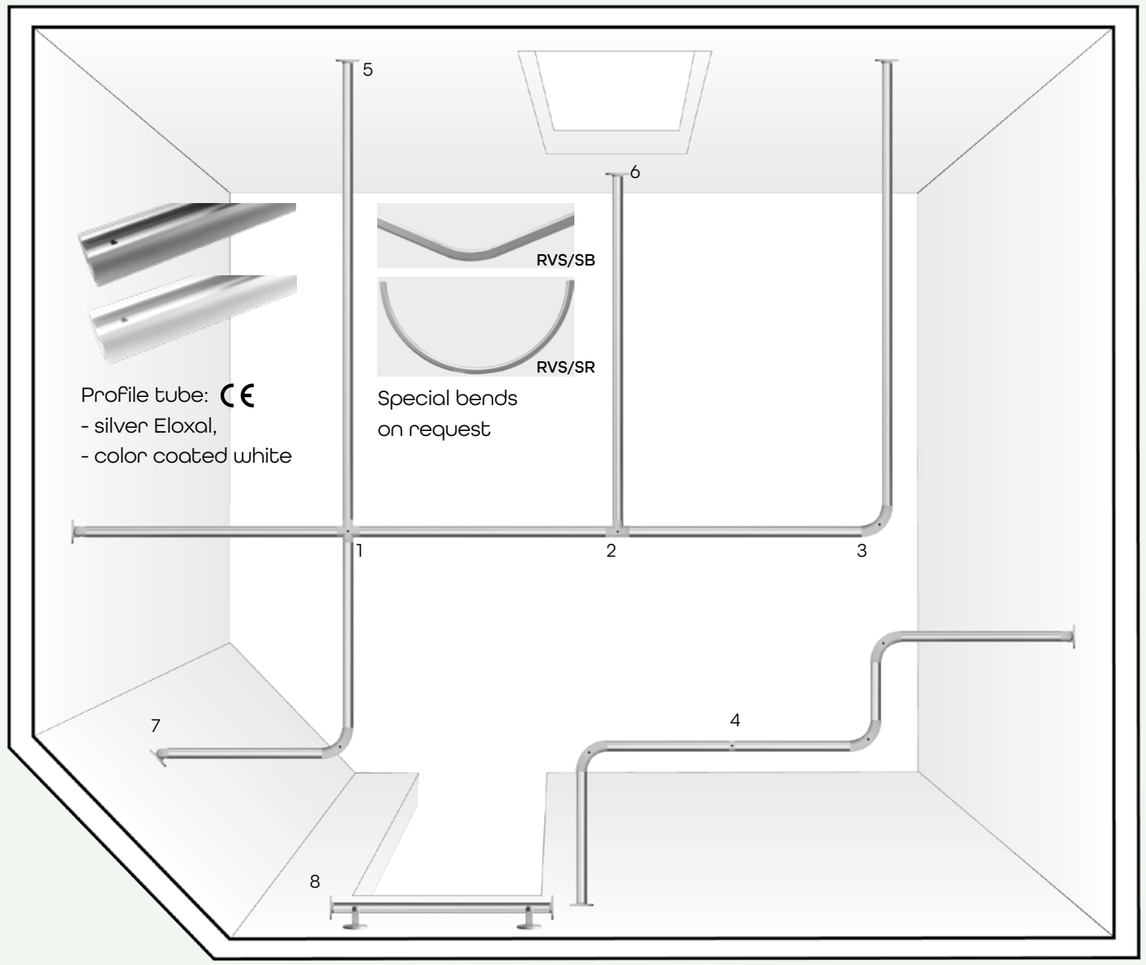
Model RVS

Scan

Easy ordering: A simple sketch suffices!

Simply prepare a hand-drawn, dimensioned sketch of the required room layout, enter the widths and lengths as well as the room height and the required headroom.

We will put together the complete system for you.

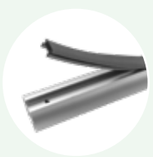


Profile tube: CE
- silver Eloxal,
- color coated white

Special bends on request

Curtain ring RVS/VR made of unbreakable polyamide: Releases itself from the curtain eyelet if overloaded (approx. 2 kg).

Ringstopper: for fixation of a curtain ring at the beginning or the end of the rail.



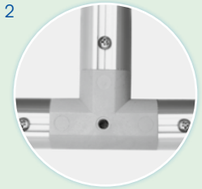
Silicone cover profile RVS/AP

With the RVS connectors, you can create cabs as you wish

1

Cross-connector (RVS/KV)

2

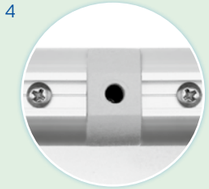


T-connector (RVS/TV)

3

Corner solutions RVS/BV (radius 60 mm)

4



Change later: simply disconnect the profile tube and install the connector of your choice, e.g. linear connector RVS/LV

RVS-Wall connections - for every requirement

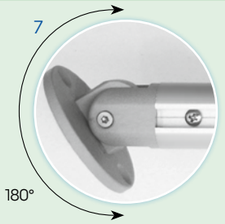
5

Free-standing end: End cap RVS/EK stops the curtain.

6

Straight at the wall: Wall connector RVS/WA

7

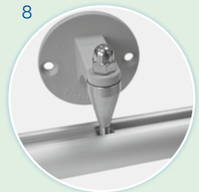


Sloped walls, acute angles: the Vario wall connector RVS/WAV compensates for and levels out asymmetries up to 180° and length differences up to +/- 5 mm.

Flexible to the ceiling - RVS ceiling connectors

Mounted directly under the ceiling: with ceiling bracket RVS/DH (distance from top of ceiling to bottom of rail approx. 6 cm).

8



Easy above the lintel: e.g. at windows or doors using the wall connector RVS/WAS

Suspended at headroom height: with the adjustable ceiling mount (+/- 20 mm) RVS/DS

For free-standing end RVS rails: adjustable double ceiling mount (+/- 2cm) RVS/DDS

Cover cap for suspended ceilings

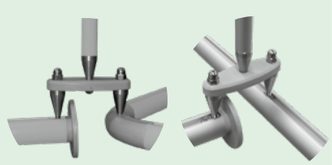
RVS/DDSPL

RVS/DSPL

Reinforcing disc for ceiling support for e.g. plasterboard ceilings

Anchoring on profile rail: possible along the whole length by means of square nut; for adjustable ceiling mount RVS/DS or with ceiling bracket RVS/DH. Max. spacing: 2 m.

Anchoring via all connectors:: Standard threaded hole for screwing in the adjustable ceiling mount RVS/DS or the ceiling bracket RVS/DH ensures firm support.



Spacer.: RVS/AH for Corner- and T-Solutions.

ropimex® convincing product quality for maximum customer satisfaction

ropimex® HyGentle: Product design and material combination for maximum hygiene

Product design: Hygiene starts with the design. Corners, angles or geometries that are ill-suited for cleaning and disinfection are avoided to the greatest possible extent.

Material composition: Cleanability and disinfectability are prioritized in the selection of the materials required for manufacturing the product. This is aimed at achieving an optimum where soiling and microbiological pollution are concerned. Porous, absorbent surfaces must be avoided.

Cleaning and disinfection: We test and document the materials of our products in terms of their natural microbial contamination, just as we document their cleanability and disinfectability with commercially available detergents and disinfectants.

Satisfied customers around the globe

Scan

Since 1976, ropimex® has been busy finding solutions to protect the privacy of the sick and those in need of care.

The telescopic screens of the early years are still in use today. From them a system developed whose diversity, use and combination options provide a suitable solution for each and every customer.

All these properties, top advice from authorised stockists and the fastest possible delivery have secured ropimex® satisfied users in over 60 countries, all over the world.

ropimex®
Our commitment

Scan

Ecological / sustainable

- ropimex® products are 98 % sourced in Germany and 100 % manufactured at the plant in Neunkirchen/Saar.
- consistent recycling of our waste such as aluminium, fabric scraps, cardboard and plastic
- we are greatly reducing our paper consumption. Our goal: paperless office
- gradual conversion of electricity-intensive consumers
- our products are phthalate-free

Tree sponsor - ropimex® supports reforestation project from PLANT-MY-TREE®

Social behaviour

- Well-being is a priority. We are happy to invest in the environment of the company
  - whether it's spacious, open-plan offices with modern equipment,
  - friendly communal areas,
  - flexible working hours or
  - homeoffice

  thanks to these practical measures, the sickness rate is low, the fluctuation rate is virtually zero.

Commitment

We also want those to benefit who are unable to participate in the performance process, or only to a limited extent. For years, we have been involved as a partner in the Lebenshilfe organisation and other measures, particularly those that support young people.

- Partner-Company 2024 - Ropimex R. OPEL GmbH is a Partner-Company of DOCTORS WITHOUT BORDERS / MEDECINS SANS FRONTIERES, we support their work with our donation.

DOCTORS WITHOUT BORDERS provides emergency medical relief in areas fraught by crisis, war, or natural catastrophes. The international organisation helps people quickly, effectively and unbureaucratically, irrespective of their race, religion or political orientation. For further information: www.msf.org

Medical device

ropimex® products meet the requirements of the regulatory specifications for medical devices in accordance with the annex to Declaration of Conformity EU 2017/745, ropimex® visual protection systems.

The systems are designed so that a patient zone / intimate zone can be created for virtually any existing condition - stationary or mobile.

ropimex® screen systems are customisable accessories for medical devices such as patient beds, treatment tables and treatment chairs in medical facilities.

Certified according to:
DIN EN ISO 9001:2015 and DIN EN ISO 14001:2015

The certification body of TÜV SÜD Management Service GmbH certifies that the company ROPIMEX R. OPEL GmbH, Bildstocker Str. 12-14, 66538 Neunkirchen, Germany has **introduced and applies a quality management system** for the scope of manufacture and sale of privacy and soundproofing elements. An audit was performed, Order No. 707145152. Proof has been furnished that the requirements according to DIN EN ISO 9001:2015 are fulfilled.

Furthermore, the company has **introduced and applied an environmental management system** for the production and sale of privacy screens and soundproofing elements as well as biocidal products, disinfectants and coating systems. An audit has provided proof that the requirements of DIN EN ISO 14001:2015 have been met.

For your safety

ropimex® products meet the highest safety standards.
