Securbed

Containment rooms are environments designed for the safe management of patients exhibiting self-harming or aggressive behaviour. In such an environment, **the Securbed psychiatric bed**, which is completely anti-trauma, is an essential piece of equipment. The Securbed is a **single bloc bed that can be fixed to the floor**. Its robust frame and durable surfaces ensure a high level of resistance, even during aggressive outbursts or crises. **Special padding and an ergonomic design protect patients who are violent** or self-harming.

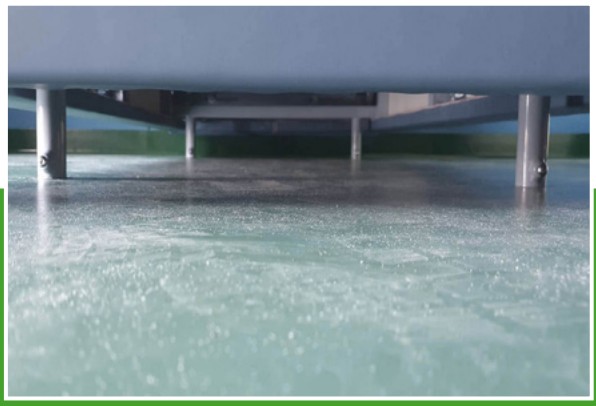

SAFE SURFACE
TOTALLY NON-TRAUMATIC

Standard equipment

- Reinforced frame made of S235JR steel made stainless by pre-treatment and thermosetting epoxy paint;
- One-piece frame with shock-absorbing padding;
- High-density, shock-absorbent, non-deformable polyurethane padding;
- Upholstery:
  - made of class 1IM (reaction to fire) silicone material;
  - sanitised with commonly used detergents and medical-surgical aids;
  - has antibacterial, antifungal, stain-resistant and waterproof properties, guaranteeing maximum hygiene and durability;
  - resistant to inks, chemicals, adhesives, sodium hypochlorite, saline solutions and commonly used disinfectants, ensuring easy sanitisation even in high-intensity use environments.

  Choice of available colours - Equipment code AC87;
- Four glides for securing the device to the floor;
- The head and foot rests are integrated into the structure and are fully padded and upholstered;
- It has an integrated, non-deformable high-density polyurethane foam mattress;

Securtop

Containment rooms are designed to enable the safe management of patients experiencing agitation or behavioural crises. The padded walls are covered with soft materials to minimise the risk of injury and ensure a safe, controlled environment.
The **Securtop** is an anti-trauma monobloc bed designed to blend harmoniously into sensitive environments. It is invaluable in **preventing accidents or trauma** during episodes of aggression or crisis.
