Hook Max10

Ligature restistant – releases at max 10 kg load

- Releases at max 10 kg load
- 360° release
- Flexible material prevents physical injury

Inspite of the hook´s ”normalized” design the unique choice of materials, combined with specific design details makes it both safe and functional. The variety of colours offers the opportunity for a tailored interior design.

The hook holds the weight of a few pieces of clothing or towels, but when an extra force is applied it releases. The hook does not break but bends, forcing the ligature to slide off. Releases in all directions, hence it can be placed close to doors etc.
