French manufacturing and environmental impact

100 % of our manufacturing is in **France**.

This approach enables us to manufacture our products with a **controlled carbon impact** for transport.

Regarding our manufacturing process, we use **materials** that can be **100% recycled** using a process of grinding followed by extrusion. The recycled PE pellets are then reused to manufacture new products.

MADE IN FRANCE

Recycled plastic materials significantly **reduce the environmental impact** as:

- 1 ton of recycled PE material saves between 2 and 3 tons of CO2 during product manufacturing.
